Who and What We Are

The purpose of the Clare County Office of Emergency Management is to protect the communities by coordinating and integrating all activities necessary to mitigate against, prepare for, respond to, and recover from threatened or actual natural disasters, acts of terrorism, or other man-made disasters. The Emergency Management Office assesses local capabilities to respond to emergency and disaster situations and advocate emergency preparedness in both the public and private sectors.

Responsibilities

- Ensure that hazards that threaten Clare County are clearly identified.
- Improve upon the local emergency response related skills of local personnel.
- Conduct exercises to test training and validate plans.
- Increase public awareness of hazards and appropriate mitigation actions.
- Identify and implement vulnerability and risk reduction measures.
- Conducts regular Local Emergency Planning Commission (LEPC) meetings.
- Assist residents and government and private sector organizations.
